

Sol

In the Mediterranean, the sun appears over the horizon as if waking up bathed by the sea. Little by little it changes from reddish tones to more pinkish ones, showing a dazzling play of colours. This is the Sol collection, selection of water-repellent fabrics, highly resistant, perfect for contract use.

Mar

The oceans support a great diversity of life and ecosystems necessary for the sustainability of the marine environment. Our aim is to help prevent them from deteriorating, which is why the Sea collection is made of fabrics with 98% recycled yarn. In this way we help to extend the life of the products.

Bio

The forests trap us and serve as a refuge in the same way as an armchair with good upholstery. The Bio collection is comfort and makes us connect with nature. It also takes care of the ecosystem in the best possible way, as it contains no chemical substances.

Eco

The leather that upholsters our armchairs did not belong to any animal. At Blasco&Vila we are committed to caring for the entire ecosystem, from vegetation to animals. That is why the Eco collection does not come from animals; it is a 100% vegan substitute for natural leather.
