

## Adena

CRASSEVIG

**DESIGN** GONCALO CAMPOS  
CRASSEVIG, ITALY

The versatile new Adena stacking chair is a refined creation presenting a magnificently balanced blend of quality and designer appeal. Steeped in practicality, softness and strength, Adena was conceived to cater effectively to the needs of the contract market.

Constructed from solid timber and designed to be stackable, Adena has a strong, durable and sturdy shape. Softness is also a key component of Adena's design. Its sweeping, winding lines give it a contemporary look that is underlined by the way in which the backrest almost seems to float above the seat. Despite its complexity, the chair has a simple style that makes it an elegant addition to any setting.

The solid timber version of Adena has an ergonomic, comfortable seat that is exceptionally soft but where additional comfort is required, an optional upholstered seat and backrest is available in various fabric options.
