

Aerial 2 Pod

DESIGN VIDAK STUDIO
NEW ZEALAND

With its slim, round leg profile, Aerial adds a refined, contemporary aesthetic to the modern office. This sturdy electric sit-to-stand desk allows you to transition effortlessly from sitting to standing at the press of the button – promoting healthier work habits. You can also wirelessly control the height of your desk, be prompted to move and track your usage via your phone or tablet with the ViDesk app. Optional fixed height also available.

Concealed cable management will appeal to those who like a tidy office. Workstations can also be reconfigured from single to back-to-back configurations to satisfy future-minded business owners. Multiple worktop shapes and accessories allow for personalisation including screens, shelves, document holders and pen rails.

The worksystem shares major components for all configurations allowing for future flexibility. Freestanding and 2 pod (shared frame) desks use the same legs, beam frames and top plates meaning 2pod desks can be turned into freestanding desks with the addition of feet.
