Beret

CRASSEVIG

DESIGN SAMUEL WILKINSON
CRASSEVIG, ITALY

Simple but elaborate, Beret embodies ñless is moreî. The pure and simplistic shape of the circle, skillfully moulded with 3D wood technology creates a stool of impressive stability and comfort. The seat is made of micro-perforated plywood; a state of the art material, that allows a variety of shapes at a reduced thickness for an increased level of elegance and style. The curvature of the seat is engineered to support the contours of the body in comfort on a confined footprint.
