

FourMe® 88 Sled

DESIGN STRAND+HVASS
OCEE & FOUR DESIGN, DENMARK

FourMe® is a versatile seating collection designed for meeting spaces, cafés and collaborative workplace environments. With its softly curved shell, generous proportions and distinctive silhouette, the collection brings together comfort, warmth and a calm architectural presence.

Available across four-leg, sled, swivel and lounge configurations, FourMe® adapts easily to both formal and informal settings. Its gently rounded form and tactile shell create a relaxed place to pause, meet or gather, while optional upholstery and a wide range of base options allow the collection to respond to different functional needs.

Designed to support natural movement and longer periods of sitting, FourMe® offers a softer, more domestic character within workplace interiors, breakout areas and reception spaces. Its refined profile and broad range of finishes allow it to sit comfortably within contemporary environments without overwhelming the room.
