

Fourmore

DESALTO

DESIGN GORDON GUILLAUMIER
DESALTO, ITALY

The extendable dining table is always a design challenge in combining the balance of technical and formal functioning. Fourmore makes a synthesis of this balance with a simple gesture of the mechanism, together with aesthetic and linear rigour, where the table maintains its proportion, both in the closed and extended versions.

The combination of materials enriches the appreciation of this product; the top in light or dark oak veneered wood contrasts with the lacquered steel frame, emphasising the lightness and elegance of the profile shape. As the name Fourmore suggests, the extension allows the addition of four seats, for both table sizes.

LEADTIME

12-14 Weeks

WARRANTY

3 Year Structural

CERTIFICATION
