

FourReal® A XL

ocee & four
DESIGN

DESIGN STUDIO OCEE
OCEE & FOUR DESIGN, DENMARK

FourReal® is a foldable table designed to quietly adapt to the shifting rhythms of workplace life. Bringing presence to communal tables, meeting points and breakout corners, its composed form offers a familiar surface for conversation, shared meals or focused work.

Designed to be folded and moved by one person with integrated castors, it responds to changing spatial needs without imposing on the room. Its restrained profile and range of refined finishes allow it to sit comfortably within contemporary interiors.

FourReal® invites fluidity in use, making quiet adjustments to layout and activity with ease and poise.
