Gather Around

SWISS DESIGN

DESIGN IN HOUSE
SWISS DESIGN, AUSTRALIA

The Gather Around collection by Swiss Design is a modular lounge system designed to bring customisable functionality to contemporary spaces. Built on four standard seat modules—straight, concave, convex and corner—and three backrest heights, the system adapts to a wide range of configurations.

High-back modules create acoustic hubs, ideal for meetings and presentations. Medium-height backs offer sound control while enabling interaction with adjacent areas, such as rear-mounted tables. Low-back options maintain openness while still providing comfort and structure.

Optional features include rear-mounted tables with flush-mounted GPO/USB chargers, upholstered armrests with integrated power, and front-of-seat charging ports. Fully upholstered and made in Australia, Gather Around reflects Swiss Design's commitment to quality craftsmanship and thoughtful, adaptive design for modern work environments.
