DESIGN ANTONIO RODRIGUEZ
LACIVIDINA, ITALY

Guest modular sofa system designed by Antonio Rodriguez responds to the needs of the commercial contract and residential markets with its substantial dimensions and enormous scope for flexible combinations to suit any exacting environment. There are soft, simple lines in this sitting landscape, which presents outstanding aesthetic value and quality to meet the design demands of the contemporary world.

The iconic, fluid Guest sofa is sophisticated, welcoming and packed with style features that will make it the centre of attention in any living area. It can fit marvelously into any architectural surrounding and its modularity makes it ideal for large lounges, as well as for adding style and personality to private settings. Guest is an ode to the purest elegance and a master class in style. While it has undeniable breadth, it avoids excessive volume and superfluous details such as stitching, which has been limited to the bare minimum to give it a peerlessly refined appearance.

There are 23 items of different shapes and sizes in the collection, for maximum flexibility. They make Guest a truly versatile product because they can be matched together in an array of modular solutions. The strong personality of the range always shines through, regardless of whether a single unit is used or large, complex combinations are formed.
