

## Hot Seat

**DESIGN** GAURAV NANDA  
BEND, USA

Bend wire seating designs are made up of intricate arrangements of wires or lines through a hand crafted method of shaping, spot welding and 'bending'. Each bend is carefully arranged to ensure structural strength, while the angles of the back, the curves of the seat, and the closeness of the wires are designed to encourage relaxation and utility. Designed with craftsmanship and comfort in mind, the Hot Seat lounge chair is a compliment to any space while reflecting an ethnicity all of its own.
