

Main Low

et al.

DESIGN LORENZO DAMIANI
ET AL., ITALY

Main represents a case where the eye is turned to the past, when the work had an artisanal dimension and each drawing needed many hours of manual work. In fact, the Main stool refers to the idea of the laboratory and brings with it the echo of a drafting stool.

In the reinterpretation that Damiani designed for et al. the tailspin seat has been replaced by a gas-lift that makes the height adjustment easier. The ash wood seat is available in 6 different finishes, from natural to black. The frame and the characteristic footrest fixed only on 3 legs are made of powdercoated steel.

The Main stool has an adjustable height that ranges from 65 cm to 75 cm, which makes it a highly flexible seat that is well suited to new ways of working and environments: from the classic and more traditional office, to informal co-working spaces and residential installations. The Main Low on the other hand, has a fixed height of 49 cm.

LEADTIME

12-14 Weeks

WARRANTY

3 Year Structural
