

Momo Net

DESIGN JEREMIAH FERRARESE
COLOS, ITALY

Momo Net introduces a lighter, more transparent style to the original Momo chair, making it ideal for outdoor use. Retaining the sturdy structure of the original, this model now features a stretched mesh seat and backrest, boosting both comfort and functionality.

The mesh design increases portability and adds a visual lightness, allowing the chair's structure to be more visible while enhancing comfort through improved airflow—particularly valuable in warm outdoor environments. The mesh also brings flexibility, offering a comfortable and resilient seating option suited to a range of spaces.

Momo Net is available with optional armrests and in a high-stool version, providing versatile options for various settings.
