

Mushroom P

Artifort

DESIGN PIERRE PAULIN
ARTIFORT, NETHERLANDS

Designed to complement the original Mushroom® (F560) armchair, Mushroom® P. (P560) ottoman is equally striking as a standalone piece and even more impactful when arranged as part of a group.

Mushroom® P. is one of Pierre Paulin's most celebrated designs. Following the creation of the iconic Mushroom® armchair – now part of the permanent collection at the Museum of Modern Art in New York – Paulin introduced the Mushroom® pouffe, a companion piece that quickly gained recognition for its distinctive form and timeless appeal.

Featured in leading design publications and admired for its sculptural simplicity, Mushroom® P. continues to reflect Paulin's innovative approach to combining artistic expression with everyday comfort.
