Node+

laCividina

DESIGN BEN VAN BERKEL / UNSTUDIO
LACIVIDINA, ITALY

Node+ is a well-structured and complex range of padded pieces, backrests, dividers and accessories. Which can be used to design micro-architectural systems that provide the scope for relaxation, work, privacy and socialisation — sometimes all at the same time.

Padded pieces, available in a range of shapes and sizes form the cornerstone of the collection. They can be placed together in endless arrangements, satisfying the needs of living rooms and public spaces. Seclusion and protection are provided by the dividing panels, armrests, backrests and cushions that can be fixed or positioned freely.
