

Ovation Single

DESIGN THINKING WORKS
THINKING WORKS, AUSTRALIA

Designed with movement in mind, Ovation draws inspiration from iconic transport systems of the world. A unique oval leg profile offers a sophisticated take on an office essential, with solutions for fixed and both electric and crank height adjustable desking available.

From focused to collaborative, Ovation can adapt to suit any environment, with the ethos of moving people quickly and efficiently in their working environments.

Like the arteries of a transport system, we have redesigned the way we route soft wiring, concealing it in an enclosed cable pathway with removable segregation and multiple access points to keep the system running smoothly and efficiently. A unique cable bridge option allows the user to conceal and segregate soft wiring from work point to work point.

Ovation's optional Power Pocket Modesty allows for up to 6xGPO points and provides a clean and easy solution for excess cabling. Acoustic screens are available at two heights with PET and upholstered finish options. Framed and Frameless options are both available.

LEADTIME

6-8 Weeks

WARRANTY

3 Year Structural
