

## Plug

CRASSEVIG

**DESIGN** MARCELLO ZILIANI  
CRASSEVIG, ITALY

Conceived to optimise and effectively organise spaces, Plug is a dynamic, flexible modular system designed specifically for public areas. The collection includes a series of seating, bench and table modules that can be connected to create infinite configurations. Graceful and understated, Plug offers a solution to the increasing demand for flexible design within the contract market.

The heart of the Plug system is a single joint that provides the scope for countless compositions. This smart solution offers boundless modular freedom and can be used to connect not only table tops to legs but also bench seats to backrests, simply by turning the joint different ways: it just needs to face down for tables or up for seating.

Sturdy and long-lasting, the design has been carefully considered, particularly where maintenance is concerned. The backrests are raised above the seat, offering quick access for cleaning, while the covers are removable and can be replaced with new colours or washed when required.

### LEADTIME

12-14 Weeks

### WARRANTY

3 Year Structural

### CERTIFICATION

CATAS Certification  
FSC Certification  
ISO 9001:2008  
ISO 14001:2004  
Product Stewardship Programme
