

Snap

et al.

DESIGN FRANCESCO MEDA
ET AL., ITALY

Snap is a project consisting of a combination of polypropylene and steel tubes that form a seat, with or without armrests, and a stool that together represent the essence of sitting in its exemplary simplicity and functionality.

The seat has an atypical shell, made up of a plastic seat and back rest joined together by two ogival section arms, to allow movement making the seat structurally and aesthetically flexible and light.

The seat can be customised in a wide range of strong and contemporary colours, perfect for refined and dynamic interior and exterior projects and for large contract environments, such as meeting rooms, cafés and corporate catering venues.

LEADTIME

12-14 Weeks

WARRANTY

3 Year Structural
