

Taco

DESIGN ALESSANDRO STABILE
LACIVIDINA, ITALY

Taco is an armchair that has forgone a traditional structure – creating a lighter form consisting of two layers of natural felt and a very slender, spring steel.

The body is produced flat and given a three-dimensional form when it is folded onto the frame. A natural balance is struck between soft and clean-cut forms, in a versatile, ergonomic design that is suitable for both the residential and contract spaces.
