**DESALTO**

**DESIGN** FRANCESCO ROTA  
DESALTO, ITALY

Mounted on oval metal sled bases, the seats appear to float in space, creating a visual effect of lightness that complements the finishes of the metal, a key material for Desalto. The bold, square, and sculptural design cleverly conceals the careful craftsmanship behind its softness. The varying thicknesses of the foam have been meticulously designed to offer the utmost cosiness and comfort.

Its modular nature provides endless possibilities, making it adaptable to every furnishing need, from small home spaces to larger contract settings.
