

Vega

Artifort

DESIGN JASPER MORRISON
ARTIFORT, NETHERLANDS

Designed by Jasper Morrison, Vega collection reflects a considered approach to contemporary seating, combining circular design principles, functionality and modern aesthetics.

Vega chair is defined by two generously rounded cushions – one forming the backrest and the other the seat – connected by an elegant metal band and supported by a slender tubular metal frame. True to Artifort's design heritage, its distinctive cushions can be customised through a variety of upholstery combinations, creating a versatile range of expressions.

Designed to complement diverse environments, Vega adapts effortlessly to waiting areas, museums, dining spaces, creative workplaces, meeting rooms and residential interiors.

With its refined simplicity and adaptable character, the collection offers a timeless seating solution with wide-ranging appeal.
