Villa

COLOS

DESIGN   JUN YASUMOTO
COLOS, ITALY

The all-metal construction of Villa blends classic lines with a contemporary aesthetic. Inspired by the natural cane seating found in Parisian sidewalk cafes, it maintains a light appearance while being extremely hardwearing.

This innovative design features a slender steel rod that elegantly curves to create a refined frame, while the wire mesh provides comfort for the seated area. The subtle interplay of curves and connections raises the shell slightly off the legs, enhancing the chair's ease of handling and stacking.

These characteristics make Villa suitable for any furniture arrangement, particularly in outdoor settings where spaces may need to be reconfigured to adapt to changing requirements or weather conditions.

LEADTIME

12–14 Weeks

WARRANTY

3 Year Structural

CERTIFICATION
